

Intent to Run

When we joined Student government three years ago, it was the first step in discovering our passion for servant leadership. Our dedication to the students has led us to something bigger than ourselves. Student Government has taught us to look towards the bigger picture, but always focus on the process. Students are the heart of UCF, they have created a dynamic, diverse and innovative culture. We firmly believe in the power of servant leadership and the importance of putting others above ourselves. As students, our goals center around fighting and advocating for the underrepresented and forgotten areas on all campuses. With our passion and drive for serving students, we promise to fight for every student and advocate for their needs.
